

## ANDRES LEPAGE

Associate Professor  
Civil, Environmental & Architectural Engineering  
The University of Kansas  
School of Engineering  
2150 Learned Hall, 1530 W. 15<sup>th</sup> St.  
Lawrence, KS 66045-7608  
Phone: 785-864-6848, Fax: 785-864-5631, E-mail: alepage@ku.edu

## EDUCATION

**Ph.D.**, Civil Engineering, 1997  
University of Illinois, Urbana-Champaign, Illinois

**M.S.**, Civil Engineering, 1991  
Universidad Simón Bolívar, Caracas, Venezuela

**B.S.**, Civil Engineering, 1987  
Universidad Rafael Urdaneta, Maracaibo, Venezuela

## PROFESSIONAL REGISTRATION

**S.E.**, Registered Structural Engineer, 2003 – Present  
State of Washington

**P.E.**, Registered Professional Engineer, 1998 – Present  
State of Washington

**P.E.**, Registered Professional Engineer, 1987 – Present  
Venezuela

## HONORS AND AWARDS

**Outstanding Faculty Award** (2013), Earthquake Engineering Research Institute (EERI) and Structural Engineers Association (SEA) Student Chapters, College of Engineering, Penn State University.

**Fellow** (2007), American Concrete Institute.

**Teaching Excellence Award** (1990), Universidad Católica Andrés Bello, Caracas, Venezuela, Civil Engineering Class of 1990.

**Academic Excellence Award** (1988), Universidad Rafael Urdaneta, Maracaibo, Venezuela, Decade-Best Grade-Point Average, Special Award Celebrating the Tenth Anniversary of the School of Civil Engineering.

**ACADEMIC EXPERIENCE**

**Associate Professor** (August 2013 – Present)

Department of Civil, Environmental and Architectural Engineering  
The University of Kansas, Lawrence, Kansas

**Assistant Professor** (January 2006 – June 2013)

Department of Architectural Engineering  
Penn State University, University Park, Pennsylvania

**Adjunct Professor** (March 2000 – June 2000)

Department of Civil and Environmental Engineering  
Seattle University, Seattle, Washington

**Research Assistant** (January 1995 – September 1996)

School of Civil Engineering  
Purdue University, West Lafayette, Indiana

**Teaching Assistant** (January 1993 – December 1994)

Department of Civil and Environmental Engineering  
The University of Illinois, Urbana-Champaign, Illinois

**Adjunct Professor** (July 1991 – December 1991)

Department of Civil Engineering  
La Universidad del Zulia, Maracaibo, Venezuela

**Adjunct Professor** (July 1989 – December 1989)

Department of Civil Engineering  
Universidad Católica Andrés Bello, Caracas, Venezuela

**TEACHING EXPERIENCE**

**A. Department of Civil, Environmental and Architectural Engineering, The University of Kansas, Lawrence, Kansas, August 2013 – Present**

Undergraduate:

CE 563 – Design of Reinforced Concrete Structures

**B. Department of Architectural Engineering, Penn State University, University Park, Pennsylvania, January 2006 – June 2013**

Undergraduate:

AE 124S – Introduction to Architectural Engineering

AE 402 – Design of Concrete Structures for Buildings

AE 431 – Advanced Concrete Design for Buildings

AE 481W – Comprehensive Architectural Engineering Senior Project I (Co-Taught)

AE 482 – Comprehensive Architectural Engineering Senior Project II (Co-Taught)

Graduate:

AE 530 – Computer Modeling of Building Structures

**C. Department of Civil and Environmental Engineering, Seattle University, Seattle, Washington, March 2000 – June 2000**

Undergraduate:

CEEGR 221 – Mechanics of Materials I

**D. Department of Civil and Environmental Engineering, The University of Illinois, Urbana-Champaign, Illinois, January 1993 – December 1994**

Graduate:

CE 398SA – Structural Analysis Special Topics (Taught Computer Lab Sessions)

**E. Department of Civil Engineering, La Universidad del Zulia, Maracaibo, Venezuela, July 1991 – December 1991**

Undergraduate:

Reinforced Concrete I

**F. Department of Civil Engineering, Universidad Católica Andrés Bello, Caracas, Venezuela, July 1989 – December 1989**

Undergraduate:

Reinforced Concrete I

**RESEARCH EXPERIENCE****Selected Research Projects**

1. Title: *High-Strength Steel Bars in Reinforced Concrete Walls: Influence of Mechanical Properties of Steel on Deformation Capacity*  
Sponsor: The Charles Pankow Foundation  
Budget: \$112,000  
Date: November 2014 – October 2016  
(Principal Investigator)
2. Title: *Use of Headed Bars as Shear Reinforcement*  
Sponsor: Electric Power Research Institute  
Budget: \$400,000  
Date: August 2014 – August 2017  
(Co-Principal Investigator)
3. Title: *Guide for Limit Design of Reinforced Masonry Walls*  
Sponsor: The NCMA Education and Research Foundation  
Budget: \$149,941  
Date: August 2012 – December 2013  
(Principal Investigator)
4. Title: *Flexural Strength and Deformation Capacity of Concrete Beams, Columns, and Walls Reinforced with High-Strength Reinforcement*  
Sponsor: Applied Technology Council (ATC)  
Budget: \$21,000  
Date: September 2011 – September 2013  
(Principal Investigator)
5. Title: *Cyclic Response of Concrete Members Reinforced with Advanced High-Strength Steel Bars*  
Sponsor: SAS Stressteel, Inc.  
Budget: \$73,209  
Date: January 2011 – December 2012  
(Principal Investigator)
6. Title: *Limit Analysis for Limit Design of Reinforced Masonry Walls*  
Sponsor: The NCMA Education and Research Foundation  
Budget: \$72,766  
Date: August 2010 – July 2012  
(Principal Investigator)

7. Title: *Development of Structural Engineering Analysis and Design Method and Experimental Evaluation of Bolt-A-Blok Masonry Wall Systems for Residential and Commercial Buildings – Phase II*  
Sponsor: Bolt-A-Blok, Inc.  
Budget: \$60,000  
Date: February 2010 – December 2011  
(Co-Principal Investigator)

### **Graduate Student Supervision**

#### **Ph.D. Students**

1. A. S. Weber-Kamin Thesis Title: *Cyclic Response of RC Coupling Beams with High-Performance Steel Bars and Fibers*, Ph.D. in Civil Engineering, completion expected August 2017. (Advisor)
2. M. S. Huq Thesis Title: *Deformation Capacities of Slender RC Structural Walls with High-Strength Steel Bars*, Ph.D. in Civil Engineering, completion expected December 2016. (Co-Advisor)
3. S. Ameen Thesis Title: *Cyclic Response of RC Coupling Beams with Diagonal High-Strength Steel Bars*, Ph.D. in Civil Engineering, completion expected December 2016. (Co-Advisor)
4. H. Tavallali, Thesis Title: *Cyclic Response of Concrete Beams Reinforced with Ultrahigh Strength Steel*, Ph.D. in Architectural Engineering, completed August 2011. (Advisor)

#### **Master of Science/Engineering Students**

5. A Suwal, Thesis Title: *Evaluation of Modeling Parameters in ASCE-41 for the Nonlinear Dynamic Analysis of RC Buildings*, M.S. in Civil Engineering, completion expected December 2015. (Co-Advisor)
6. B. S. Frederick, Thesis Title: *Evaluation of Limit Design for Earthquake-Resistant Masonry Walls*, M.S. in Architectural Engineering, completed July 2014. (Co-Advisor)
7. K. Tretiakova, Thesis Title: *Cyclic Response of Concrete Columns Reinforced with SAS 670 Steel Bars*, M.S. in Architectural Engineering, completed August 2013. (Advisor)
8. R. E. Sanchez, Thesis Title: *Limit Design of Earthquake-Resistant Masonry Walls*, M.S. in Architectural Engineering, completed August 2012. (Advisor)

9. S. J. Pfund, Thesis Title: *Cyclic Response of Concrete Beams Reinforced with ASTM A1035 Grade 120 Steel Bars*, M.S. in Architectural Engineering, completed August 2012. (Advisor)
10. H. Ota, Thesis Title: *Experimental Study of Mortarless Post-Tensioned Masonry Walls and Development of Design Guidelines*, M.S. in Architectural Engineering, completed August 2011. (Co-Advisor)
11. J. M. Shoemaker, Thesis Title: *Acceleration Response of Rigid and Flexible Nonstructural Components in Buildings Subjected to Strong Ground Motions*, M.S. in Architectural Engineering, completed December 2010. (Advisor)
12. M. W. Hopper, Thesis Title: *Analytical Models for the Nonlinear Seismic Response of Reinforced Concrete Frames*, M.S. in Architectural Engineering, completed December 2009. (Advisor)
13. J. Setthachayanon, Project Title: *An Experimental Study of Autoclaved Aerated Concrete Lintels Strengthened with Externally Bonded Glass FRP*, M.Eng. in Architectural Engineering, completed December 2009. (Co-Advisor)

**Visiting Scholar Supervision**

1. S. Delgado, Project Title: *Analysis of Framed Structures Subjected to Overloads*, Ph.D. Candidate at Universidad de los Andes (Mérida, Venezuela), August 2007 to September 2008.

**Undergraduate Student Supervision****Honors Theses**

1. J. Wiest, Thesis Title: *Judicial Center Annex in Rockville, MD*, B.A.E/M.A.E, Architectural Engineering, completed August 2012. (Advisor)
2. K. Gromowski, Thesis Title: *Papadakis Integrated Sciences Building at Drexel University, Philadelphia, PA*, B.A.E/M.A.E, Architectural Engineering, completed May 2011. (Advisor)
3. K. McKitish, Thesis Title: *Redesign of House of Sweden in Georgetown, Washington, D.C.*, B.A.E/M.A.E, Architectural Engineering, completed December 2009. (Advisor)
4. M. Hopper, Thesis Title: *John Jay College Expansion in New York City*, B.A.E, Architectural Engineering, completed December 2009. (Advisor)
5. L. Lynch, Thesis Title: *Redesign of Aquablue at the Golden Mile in Hato Rey, Puerto Rico*, B.A.E/M.A.E, Architectural Engineering, completed May 2009. (Advisor)

6. A. Bradford, Thesis Title: *Optimization of Building Systems and Processes for the Center for Science and Medicine in New York City*, B.A.E/M.A.E, Architectural Engineering, completed May 2008. (Advisor)
7. M. Longenecker, Thesis Title: *Alternative Lateral-Resisting Systems for Whiteland Village in Exton, PA*, B.A.E/M.A.E, Architectural Engineering, completed December 2007. (Advisor)

"Behavior of Ultrahigh Strength Steel Reinforced Concrete Members Subjected to Large Deflection Reversals", American Concrete Institute, Fall Convention, Special Technical Session, New Orleans, Louisiana, November 9. [Presented by Tavallali]
21. Lepage, A., and Delgado, S. A. (2008). "A Shot in the Dark: Use of Nonlinear Dynamic Analysis for Computing the Seismic Response of Reinforced Concrete Structures", Structural Engineering Graduate Student Seminars, Penn State University, Department of Civil Engineering, University Park, Pennsylvania, April 9. [Presenter]
22. Lepage, A., and Delgado, S. A. (2008). "Optimal Hysteresis Model Parameters for the Seismic Response of Reinforced Concrete Frames", American Concrete Institute, Spring Convention, Special Technical Session, Los Angeles, California, March 31. [Presenter]
23. Ghosh, S. K., Bracci, J. M., Caldarone, M. A., Harman, D. K., Jansen, D. C., Matamoros, A., Taylor, A. W., Kelly, D. J., Lepage, A., and Russell, H. G., (2006). "High-Strength Concrete in Moderate to High Seismic Applications (ACI ITG 4)", American Concrete Institute, Fall Convention, Special Technical Session, Denver, Colorado, November 7. [Presented by Ghosh]
24. Boggs, D., and Lepage A. (2006). "Wind Tunnel Methods", American Concrete Institute, Fall Convention, Special Technical Session, San Francisco, California, October. [Presented by Boggs]

25. Lepage, A., Neuman, S. L., and Dragovich, J. J. (2006). "Practical Modeling for Nonlinear Seismic Response of RC Wall Structures", Eighth National Conference on Earthquake Engineering, San Francisco, California, April 20. [Presenter]
26. Warden, B., Browning, J., Matamoros, A., and Lepage, A. (2006) "Correlating Nonlinear Response with Approximate Linear Analysis", Eighth National Conference on Earthquake Engineering, San Francisco, California, April 19. [Presenter]
27. Lepage, A., Aschheim, M., and Senescu, R. (2004). "Shear-Yielding Steel Outriggers for High-Rise Construction", 13th World Conference on Earthquake Engineering, Vancouver, Canada. August. [Presenter]
28. Matamoros, A., Garcia, L. E., Browning, J., and Lepage, A. (2004). "Flat-Rate Design Method for Low- and Medium-Rise RC Structures", American Concrete Institute, Fall Convention, Special Technical Session, San Francisco, California, October. [Presenter]
29. Hueste, M. B. D., Browning, J., Lepage, A., and Wallace, J. W. (2004). "Performance Based Seismic Design Criteria for Slab-Column Connections", American Concrete Institute, Fall Convention, Special Technical Session, San Francisco, California, October. [Presented by Hueste]
30. Lepage, A. (2004). "Seismic Design Using the 2003 IBC and ASCE 7-02", Structural Engineers Association of Washington (SEAW), Engineering Seminar, SEAW Earthquake Engineering Committee, Seattle, Washington, October. [Presenter]
31. Lepage, A., and Hochwalt, J. (2002). "A Practical Approach for Addressing the Deformation Compatibility of Flat Slabs", American Concrete Institute, Spring Convention, Special Technical Session, Detroit, Michigan, April. [Presenter]
32. Lepage, A. (1998). "Response of an Instrumented Seven Story Reinforced Concrete Building to Ground Motions", American Concrete Institute, Spring Convention, Special Technical Session, Seattle, Washington, April. [Presenter]

## PROFESSIONAL AFFILIATIONS AND SERVICES

### Memberships

1. The Masonry Society (TMS)  
Member since 2008
2. Consortium of Universities for Research in Earthquake Engineering (CUREE)  
Member since 2006
3. Structural Engineers Association of Washington (SEAW)  
Member since 2003
4. Honor Society of Phi Kappa Phi  
Member since 1997
5. Earthquake Engineering Research Institute (EERI)  
Member since 1993
6. American Society of Civil Engineers (ASCE)  
Member since 1992
7. American Concrete Institute (ACI), Fellow  
Member since 1983

### Service to the Profession

#### Technical Committees

1. Architectural Engineering Institute (AEI)
  - Committee on Seismic Effects on Nonstructural Components, Member, 5/12 – Present
2. NEHRP Consultants Joint Venture
  - Task Order 34 Project Review Panel, Assessment of ASCE 41 First Generation Performance-Based Seismic Design Methods for New Building in High-Seismic Regions, 11/12 – Present
  - Task Order 25 Project Technical Committee, Use of High-Strength Flexural Reinforcement in RC Seismic Design (ATC 98), Voting Member, 9/11 – 9/12
3. The Masonry Society (TMS)
  - Research Committee, M.S. Theses and Ph.D. Dissertations Competition, Voting Member, 8/14 – 9/14
  - Masonry Standards Joint Committee (MSJC), Flexure-Axial-Shear Subcommittee, Corresponding Member, 2014 – Present
  - Masonry Standards Joint Committee (MSJC), Seismic Subcommittee, Corresponding Member, 2008 – Present
  - Ductility Task Group, MSJC Seismic Subcommittee, Voting Member, 10/07 – 12/10

4. Network for Earthquake Engineering Simulation (NEES)
  - NEES Users Forum, Member, 7/10 – 12/13
  - NEESComm Earthquake Reconnaissance Team – Chile Earthquake, 3/10
5. American Institute of Steel Construction (AISC)
  - Task Committee TC5, Composite Design, Voting Member, 1/08 – Present
6. American Concrete Institute (ACI)
  - Voting Member in Committees
    - ACI 318R Struct. Conc. Building Code (High-Strength Steel), 10/14 – Present
    - ACI CAP-SC3 Award for Papers in Structural Research, 2/12 – 8/13
    - ACI ITG-6 High-Strength Steel Reinforcement, 6/07 – 8/10
    - ACI CAP-SC1 Awards for Papers in Construction, 1/06 – 6/06
    - ACI PUBS Publications Committee (Board Appointment), 1/05 – 4/11
    - ACI 318H Structural Concrete Building Code (Seismic), 10/04 – 10/14
    - ACI ITG-4 High-Strength Concrete in Seismic Regions, 10/02 – 4/07
    - ACI 335 Composite and Hybrid Structures, 9/02 – Present
    - ACI 369 Seismic Repair and Rehabilitation, 4/01 – 12/09
    - ACI 375 Performance-Based Wind Design, 10/99 – Present
    - ACI 374 Performance-Based Seismic Design, 10/98 – Present
7. Structural Engineers Association of Washington (SEAW)
  - Concrete Task Group, Chair, 1/03 – 12/05
  - Earthquake Engineering Committee, Voting Member, 7/98 – 12/05

### **Editorships and Manuscript Reviews**

1. Editorial Board Member, International Journal of High-Rise Buildings, Council on Tall Buildings and Urban Habitat, 7/11 – Present
2. Journal Papers – Peer Reviewer
  - Earthquake Spectra (EERI)
  - Structural Journal and Special Publications (ACI)
  - Structural Journal (ASCE)
  - The Masonry Society Journal (TMS)
3. Conference Papers – Peer Reviewer
  - Architectural Engineering Institute Conference, 2013
  - Architectural Engineering Institute Conference, 2011
  - Sixth Intl. Conf. on Innovation in Architecture, Eng., and Construction, 2010
  - Ninth U.S. National and Tenth Canadian Conf. on Earthquake Eng., 2010
  - Eighth U.S. National Conference on Earthquake Engineering, 2006

4. Grant Review Panels
  - National Science Foundation, Program Solicitation NSF 08-519, Network for Earthquake Engineering Simulation Research (NEESR), 2008

#### **Organizing Conferences and Other Activities**

1. Proposed New Appendix for the 2013 Building Code Requirements and Specification for Masonry Structures: Limit Design Method for Special Reinforced Masonry Shear Walls (Main Author), July 2011.
2. Member of Advisory Panel for NIST-Sponsored Research Project “Performance-Based Design of Reinforced Masonry Shear Walls”, May 2010 to June 2013.
3. Chair of Seismic Conversion Task Group, Reorganization of “Building Code Requirements for Structural Concrete (ACI 318-14), Version 1.0”, Conversion of ACI 318-08 Chapter 21 to ACI 318-14 Chapter 17. January 2010.
4. ACI Special Technical Session on Recent Developments in Seismic Evaluation and Rehabilitation of Concrete Buildings (Co-Organizer and Moderator), Sponsored by ACI Committee 369 on Seismic Repair and Rehabilitation, American Concrete Institute, ACI 2008 Spring Convention, Los Angeles, CA, April 2, 2008.
5. Member of ACI Committee 318 Ad-hoc Task Group for Overall Review of Proposed Seismic Code Provisions in ACI 318-08 (Building Code Requirements for Structural Concrete and Commentary), February – April 2007.
6. External Reviewer for Proposed Changes to ACI 318-05 (Building Code Requirements for Structural Concrete and Commentary) by Subcommittee 318-D (Flexure and Axial Loads), February 2007.
7. External Reviewer for Proposed Changes to ACI 318-05 (Building Code Requirements for Structural Concrete and Commentary) by Subcommittee C (Serviceability/Safety), February 2007.
8. ACI Special Technical Session on New Frontiers in Shear Design (Co-Organizer and Moderator), Sponsored by ACI-ASCE Joint Committee 445 on Shear and Torsion, American Concrete Institute, ACI 2006 Fall Convention, Denver, CO, November 7, 2006.
9. Corresponding Member for the Department of Architectural Engineering at Penn State University, Academic Council for Preparation of Problems for the NCEES Architectural Engineering Professional Licensure Exam (AE/PE). Prepared and submitted seven peer-reviewed problems for use in the AE/PE exam, August 2006.

**INDUSTRY EXPERIENCE**

- A. **KPFF Consulting Engineers Inc., Seattle, Washington**  
Associate, July 1998 – December 2005
- B. **Andersen Bjornstad Kane Jacobs Inc., Seattle, Washington**  
Project Engineer, October 1996 – June 1998
- C. **Servicios de Ingeniería en Microcomputadoras SRL., Caracas, Venezuela**  
Project Engineer, September 1987 – December 1991

**Selected Industry Projects**

1. *Sea-Tac Rental Car Facility* (2006)  
Lateral System Design Specialist – KPFF Consulting Engineers, Inc.  
Three 5-story buildings provide 2.1 million square feet to accommodate parking for 5,400 vehicles and office/commercial spaces. The reinforced concrete post-tensioned floor system typically consists of 5.25-in. one-way slab spanning 18 ft over beams spanning 60 ft. The beams frame into 36-ft long girders supported by 32-in. square columns with a typical clear height of 10-ft. Beams and girders are typically 24-in wide by 35.25-in. deep. Every column line (on a 36 ft by 60 ft grid) is used as part of the seismic force-resisting system designed as post-tensioned special moment frames without shear walls. Modern seismic design criteria were developed to supplement the rudimentary design provisions contained in the building code for this type of system, first of its kind in the West Coast.
2. *Olive 8, Seattle, Washington* (2005)  
Lateral System Design Specialist – KPFF Consulting Engineers, Inc.  
The first LEED certified hotel/condo building in Seattle. The 39-story mixed-use tower includes a 349-room five-star Hyatt hotel and 198 residential condominiums. The hotel occupies the first 17 floors while the condos occupy the top 22 floors. There are five levels of underground parking. The elevated floor slabs consist of reinforced concrete two-way flat plates. The lateral system consists of reinforced concrete structural walls (stand-alone core) without moment frames. The design triggered special peer review requesting nonlinear dynamic analyses to verify stringent structural performance objectives when subjected to ground motions representative of the 2500-year seismic event.

3. *Fred Hutchinson Cancer Research Center, Seattle, Washington (2002)*  
Project Engineer – KPFF Consulting Engineers, Inc.  
A series of state-of-the-art research facilities: the Cancer Care Alliance Building, a seven-story superstructure with 150,000 square feet of treatment space, as well as a four-story basement with 147,000 square feet of parking and mechanical space; the Administrative Building, a 203,000-square-foot structure with six levels of office space and four levels of below grade parking; and the Public Health Sciences Building, a 500,000-square-foot building with three underground levels and five stories of office space above grade. The lateral force-resisting systems combine eccentric and/or concentric steel braced frames with special reinforced concrete shear walls. The buildings were designed using performance-based design targeting immediate occupancy for a 475-year seismic event.
4. *Sammamish Parkplace, Issaquah, Washington (1998)*  
Project Engineer – KPFF Consulting Engineers, Inc.  
Two office buildings, each six-story high, provide 1.1 million square feet of office space. In addition, two separate parking structures provide space for more than 1800 cars. The floor construction for both office buildings consists of post-tensioned concrete flat slabs. The floors for both parking structures combine post-tensioned one-way slabs and long-span beams. Lateral loads in all four structures are resisted by special reinforced concrete shear walls proportioned and detailed using displacement-based design provisions.
5. *Harbor Steps North Towers, Seattle, Washington (1997)*  
Project Engineer – Andersen Bjornstad Kane Jacobs, Inc.  
Two high-rise residential towers, one rises 13 stories, the other 29 stories. The structural floor system consists of two-way, post-tensioned concrete flat slabs. The lateral force-resisting system for the 13-story tower uses stand-alone special reinforced concrete shear walls around a central core. The 29-story tower uses a dual system with skip moment frames: concrete shear walls work in parallel with special moment-frame columns restrained by beams at every other floor.
